

International Economic, Organizational & Human Capital Development

About Us

Cultiva Global Solutions launched as a **minority-owned business (MBE)** in 2011 and has since grown into a sought-after federal government contractor addressing the international economic challenges of developing a world in which communities and societies become more prosperous through equitable and fair governance that prioritizes safety, health and environmental sustainability. With an exceptional reputation for client satisfaction, project identification/execution, financial structuring, and strategic partnership development, we deliver our solutions/services with a passion and commitment to **cultivating positive global change**.

With a commitment also to domestic economic development as a **HUBZone certified small business**, CULTIVA has recruited, vetted, and assembled an elite, highly skilled partner network resulting in a comprehensive and vast global network of delivery partners and a portfolio of services/solutions to meet our clients' needs.

US Trade & Development Agency

In our previous engagement with USTDA, we effectively managed reverse trade missions, showcasing our proficiency in event organization, logistics handling, and provision of multilingual translation services, thereby affirming our capacity to undertake multifaceted tasks. Engagement also includes project management, strategic advertisement, conference and event management, and logistics support.

US Agency for International Development:

Multiple engagements with Prosper Africa Program convening African Diaspora community with USG representative, business leaders, coalition and association allied organizations and international Agrican expertise for the purposes of informing and shaping policy, activities and priorities of the Prosper Africa Program.

US Department of Agriculture:

In our current engagement In our collaboration with USDA FPAC, we provide Limited English Proficiency Services, demonstrating our expertise in delivering high-quality translation and interpretation services. This experience, coupled with our ability to handle logistics and event management, positions us well to execute similar tasks effectively.

US Patent & Trade Office:

Provision of a diversity of services including procurement assistance, human resource practice support and strategy advisement, project management, human capital audits, assessment and reviews, organizational assessment and recommendations to the OIG.

Department of the Interior:

Engaged in a diversity of activities with the agency including project management, business process modeling, records management, agency compliance and data management system.
